DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter, which the applicant regards as his invention.

2. Claim 102 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

3. It is not clear whether the cited molecular weight is the molecular weight of the pellet or the film. The insertion of the phrase "in the film" is required in the last line after "PHA".

Double Patenting

4. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Art Unit: 1714

5. Claims 95-115 and 125-135 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-11 of U.S. Patent No. 6,127,512. Although the conflicting claims are not identical, they are not patentably distinct from each other because although the molecular weight of the film is not stated in the patent, it is inherent in the starting materials and the process.

Claim Rejections - 35 USC § 103

6. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

7. Claims 95, 96, 102-115 and 125-135 are rejected under 35 U.S.C. 103(a) as being unpatentable over Herring et al. 5,061,743, in view of Bright et al. 5,502,273 or Hammond et al. 5,753,782, further in view of McBride et al. 5,217,803 or Nemphos et al. 5,300,576.

8. All references have been discussed previously. It is acknowledged that Herring et al. do not explicitly disclose a blown or cast free-standing film, however a film is definitely within the purview of the reference, as can be seen in column 3, line 36 and in column 4, line 51. The composition of the reference contains applicants' thermal stabilizers and the molecular weight of the of the PHA powder disclosed by Herring et al. is sufficiently high to yield a film with the molecular weight claimed by applicants. The claimed film has no structure, which would distinguish it from any other extruded and/or molded article, which has undergone two heat cycles. The rejection is maintained. The incorporation of any of claims 97-101, 134 or 135 would obviate this rejection.
